I'm an over the road truck driver and would like to have the local traffic and weather for the cities that I deliver to. Satellite radio is a very viable means of doing this. I often times can not recieve this information until it is to late to avoid the congestion or bad weather. This would be of great value in planning my trip route. Also it is difficult to get the local stations on the AM/FM radio simply because a person is not familar with the stations frequency or call sign. I respectfully ask you to reject NAB's petition 04-160. Thank you for consideration on this petition.
